Login:

On the login page Enter the **Email address** and **Password** you used when registering and your password.

Click **Log in**.

The image shows a mobile application login screen with a dark blue background and a world map pattern. At the top, the status bar shows the time 8:14, signal strength, Wi-Fi, and 52% battery. A US flag icon is in the top right corner. The main heading is "Login to your account" in white, with a link "Did not have any account? Sign up" below it. There are two input fields: "Email" and "Password" (with an eye icon for visibility). A "Forgot Password?" link is to the right of the password field. A large blue "Login" button is centered below the fields. Below this is a separator line with "OR" in the middle. Two social login buttons are shown: "Continue with Facebook" (with the Facebook 'f' logo) and "Continue with Google" (with the Google 'G' logo). At the bottom, a disclaimer reads "By signing up, you agree with our Terms of services and privacy policy." The Android navigation bar is visible at the very bottom.

Connect to OrcaVPN

Upon logging in, the Orca app's home page, where the VPN connection status is displayed, will be immediately visible. On this page, users will be able to see the server map and the upload and download speed of your existing connections.

1- To ensure the security and privacy of your internet connection, simply connect to Orca VPN servers. Just select any server from the map or swipe up the lower section to “**select a location**” and click the '**Connect**' button in blue, and your app will establish a connection with the swiftest server at hand."

2- You can change different server locations very easily by revisiting the same page and picking any different location or simply searching the location using the search bar on the top.

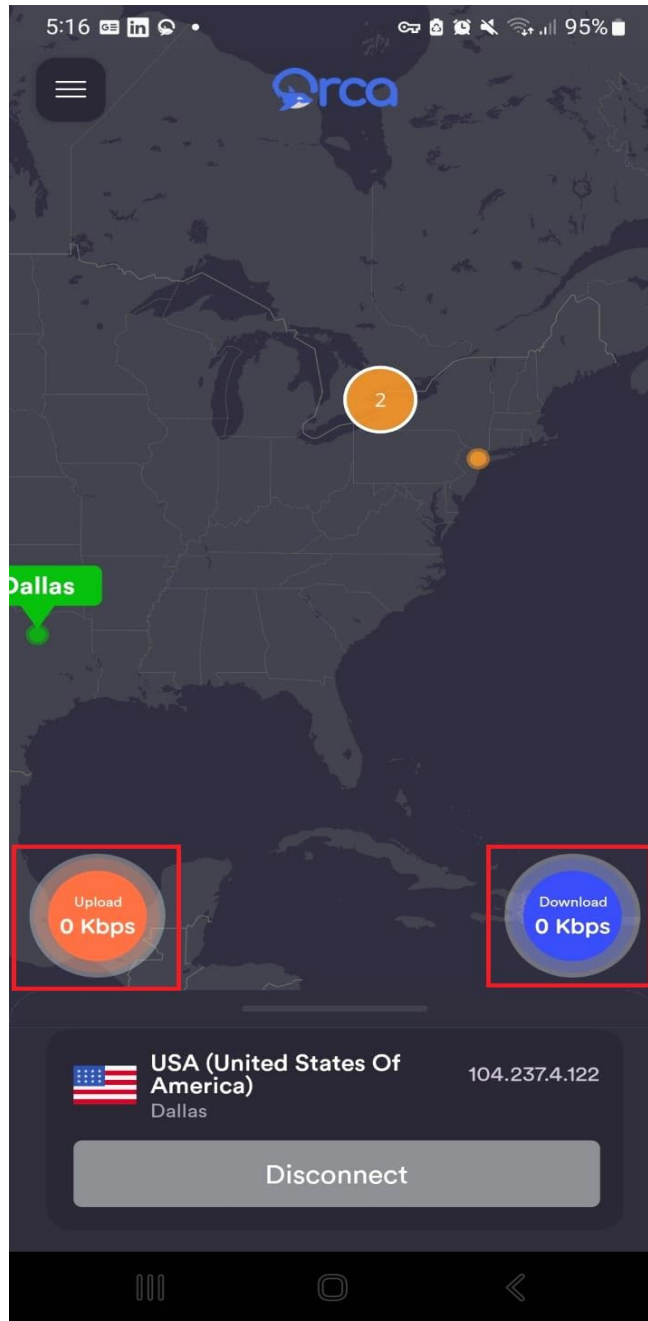

3- When a user clicks on a country they will be able to see different servers in different countries. They can also see the connection percentage for the faster connections.

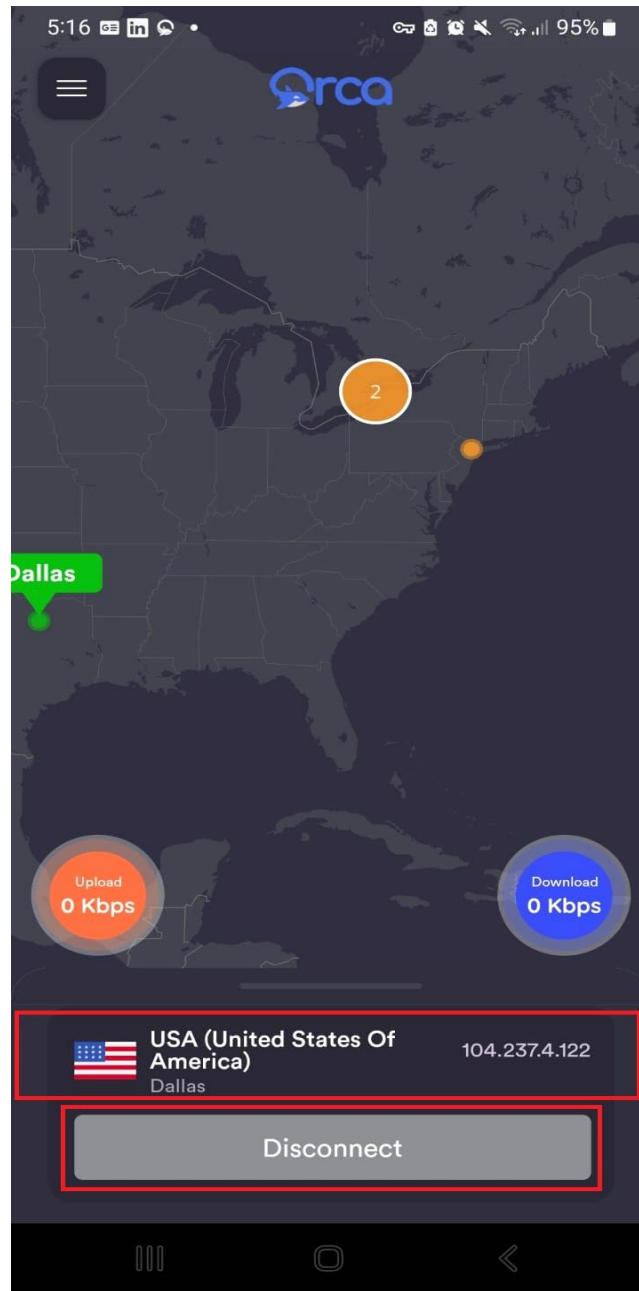

4- Choose your desired country and its fastest server for a fast and secure internet connection.

Connection Status

When you are successfully connected to OrcaVPN, you will be able to see your connection **Download** and **Upload** speeds on the home page.

2- At the bottom of the screen you will see the connection details such as Server location, Your new IP address, and the option to disconnect.

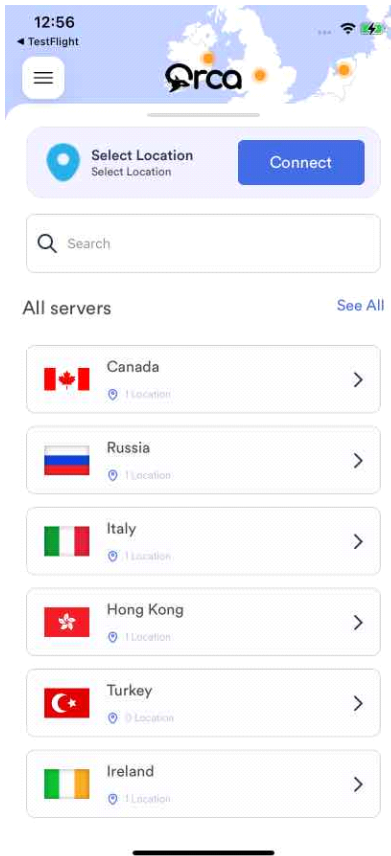

3- To disconnect from the VPN, click the Disconnect button.

Choose and Manage Orca VPN

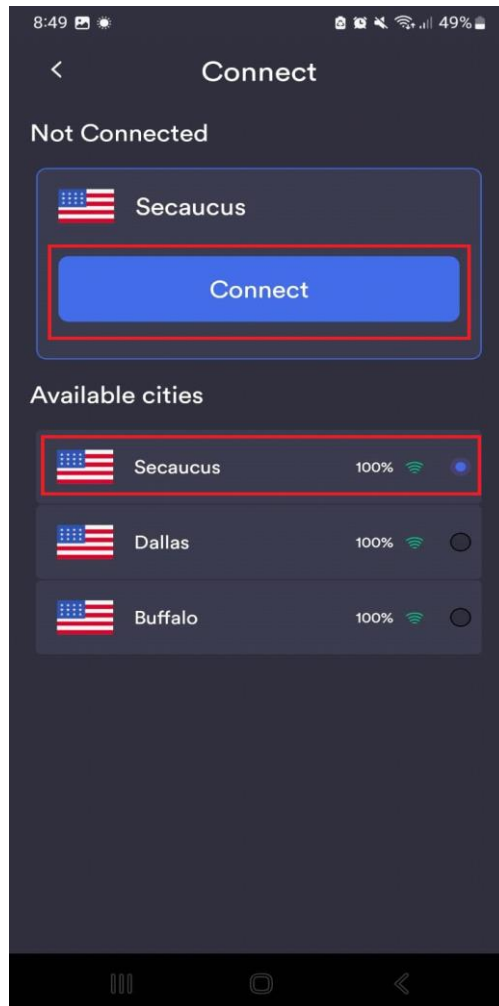

Desiring to link up with a particular location? Orca VPN gives you the option to connect to several different servers spanning 20+ countries, allowing you to connect to any of them.

1- Navigate to the Locations section within your Orca VPN app and select your preferred location.

2- Tap on the preferred country from the list and you will be redirected to a new page with a list of cities.

3- Select any particular city and click the blue connect button to that particular location.

Manage OrcaVPN Key features

To manage other key features of this application users have to click on the Hamberger menu button. They will be able to edit the following options

- 1- Change app Mode (Light or Dark)
- 2- My Account
- 3- Speed Test
- 4- IP checker
- 5- Settings
- 6-Logout

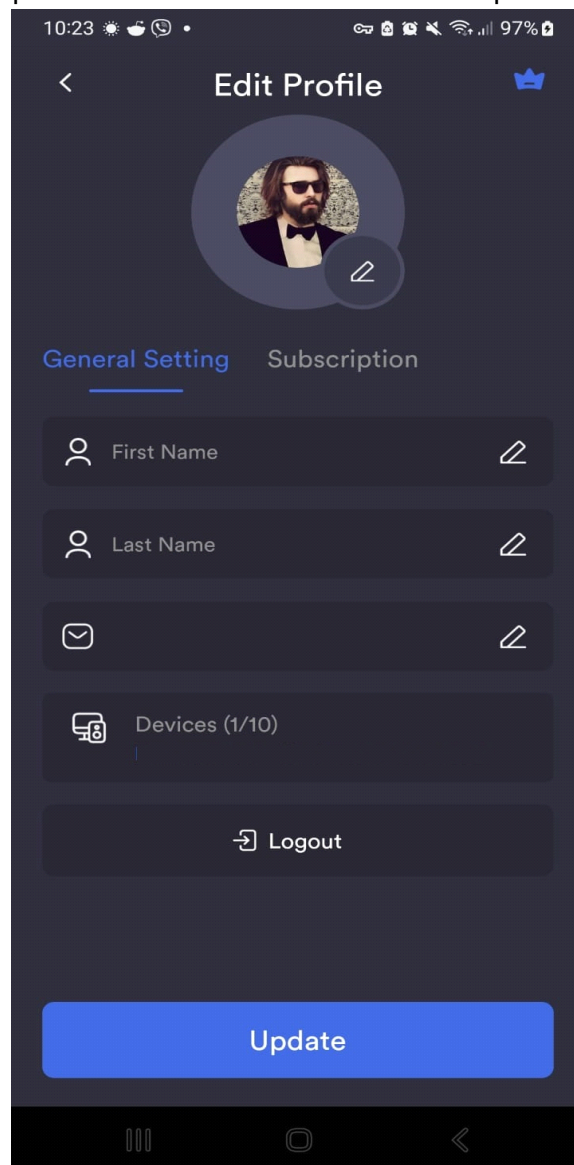

Change app Light Mode (Light or Dark)

To change the application color mode you can pick either lite color or dark color modes simply using the slide button option.

My Account

Click on the My Account option to view the account and subscription details.

General Settings

When you click on my account you will be redirected to a page that shows your general settings and on this page, you can add the following information:

Edit/ Upload profile picture.

First Name

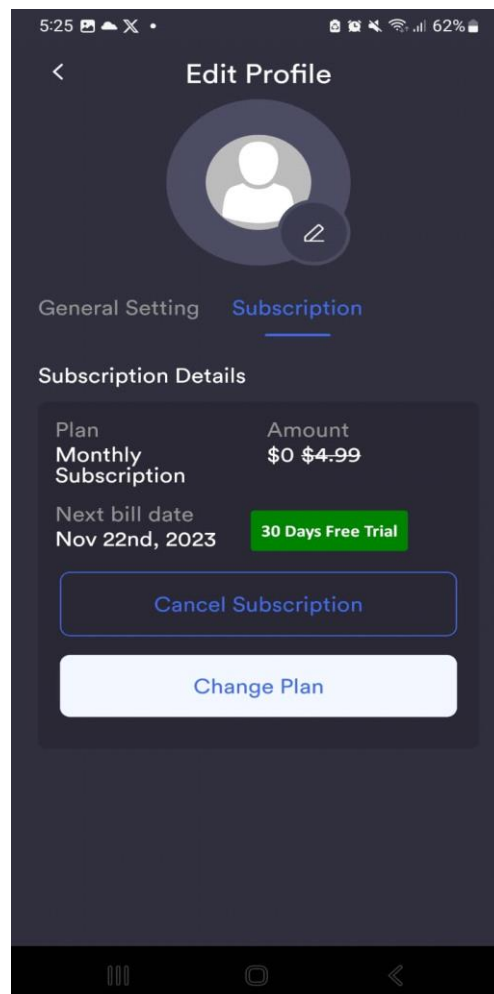

Last Name

Email Address

On this page, you will see your mobile device details and a logout button to logout from the application.

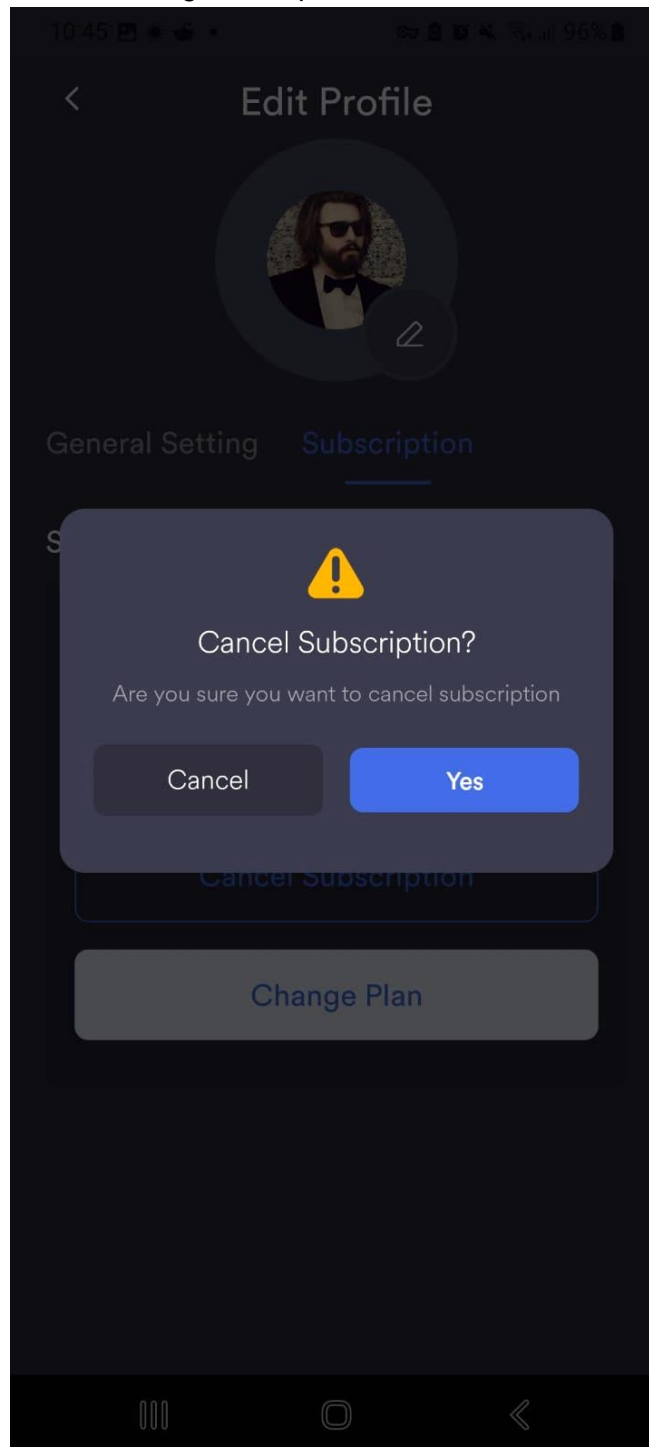

Subscription

When you click on the subscribe tab you will see the details of your subscription.

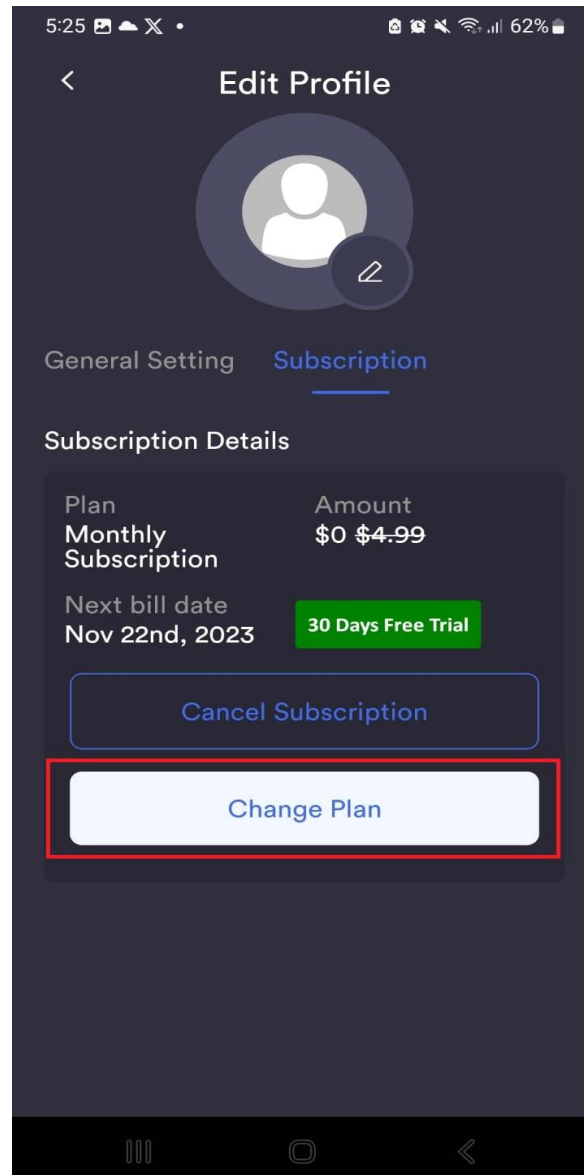

Cancel Subscription

If you want to cancel your subscription, you can click on **cancel subscription** Blue and black button. A popup will appear to confirm the cancelation of your subscription. You have to press the “**Yes**” button to cancel an existing subscription

Change plan

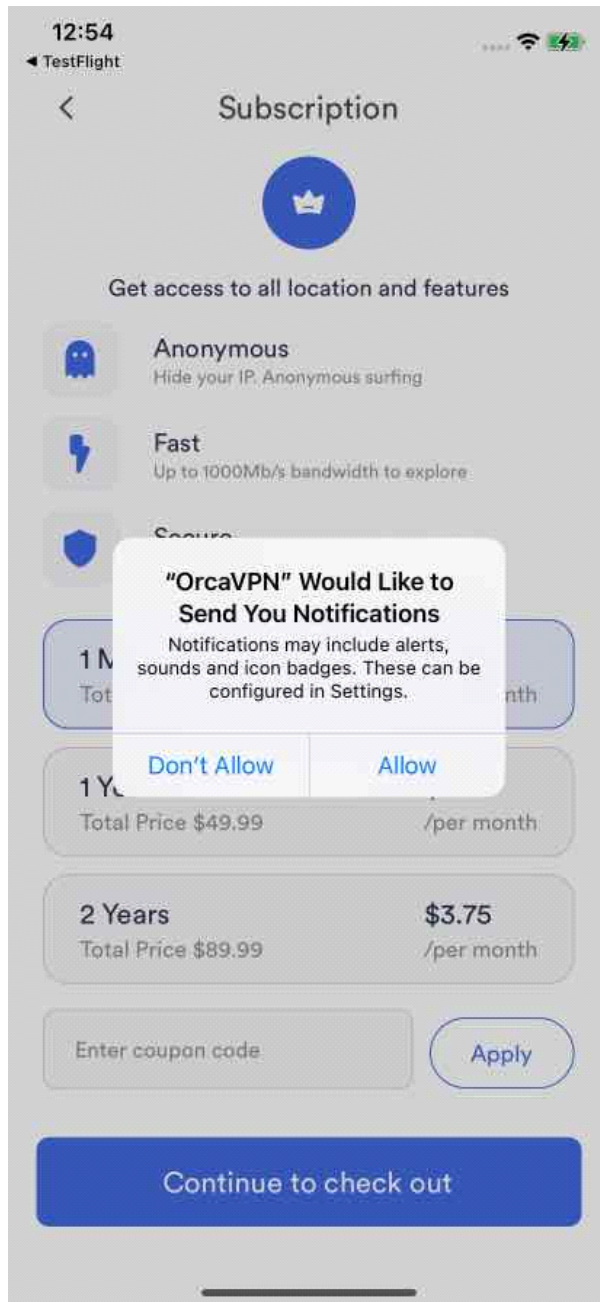

If you want to change your subscription plan then you have to click the **Change Plan** button and the application redirects you to a new page with different subscription packages.

You can select Either:

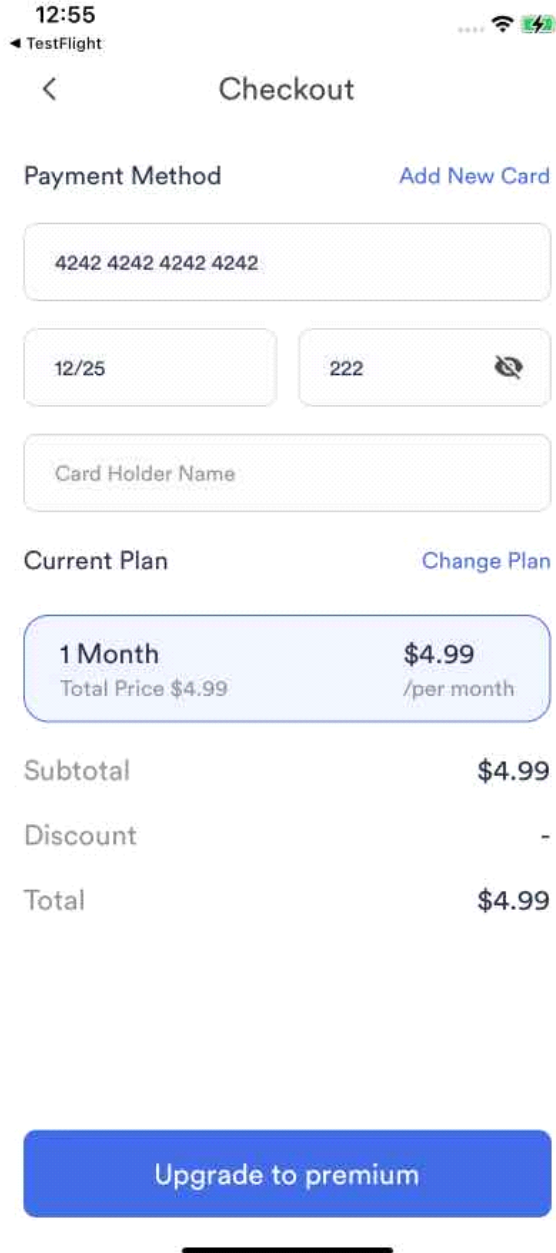

- **1 Month subscription**
- **1 Year Subscription**
- **2 Years Subscription**

Or if you have a coupon code you can add that into the **Enter coupon Code** text box and hit the **Apply** button. Once you add that you can then click on the **Continue to check out** button. If the popup appears to ask you that OrcaVPN wants to send notification then click on **Allow** button in pipup to continue the installation process and start usign app.

Check out

On the Checkout page, you will see your current plan details and options to add a new payment method. Click on the **Add new Debit or credit card** option to add new card details and once you pick the desired package. Click on the **Upgrade to Premium** blue button to complete the checkout process.

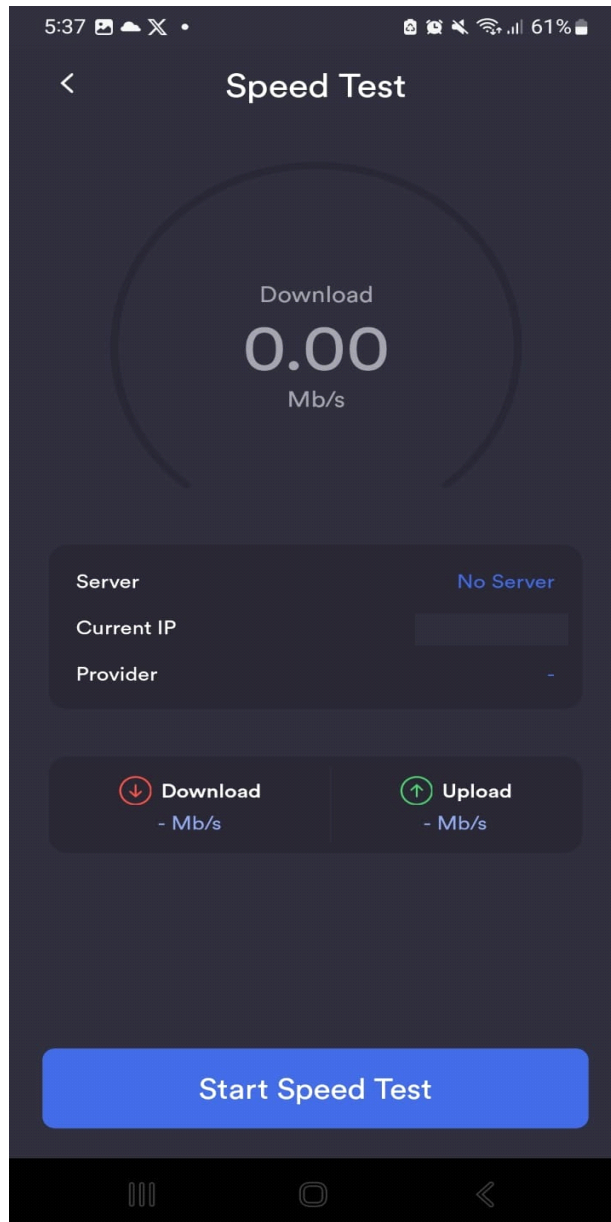

Speed Test

If you want to check the speed of your internet connection after enabling Orca VPN. Simply click on the Speed Test option from the menu and the application will take you to a new page where you will be able to start the speed test.

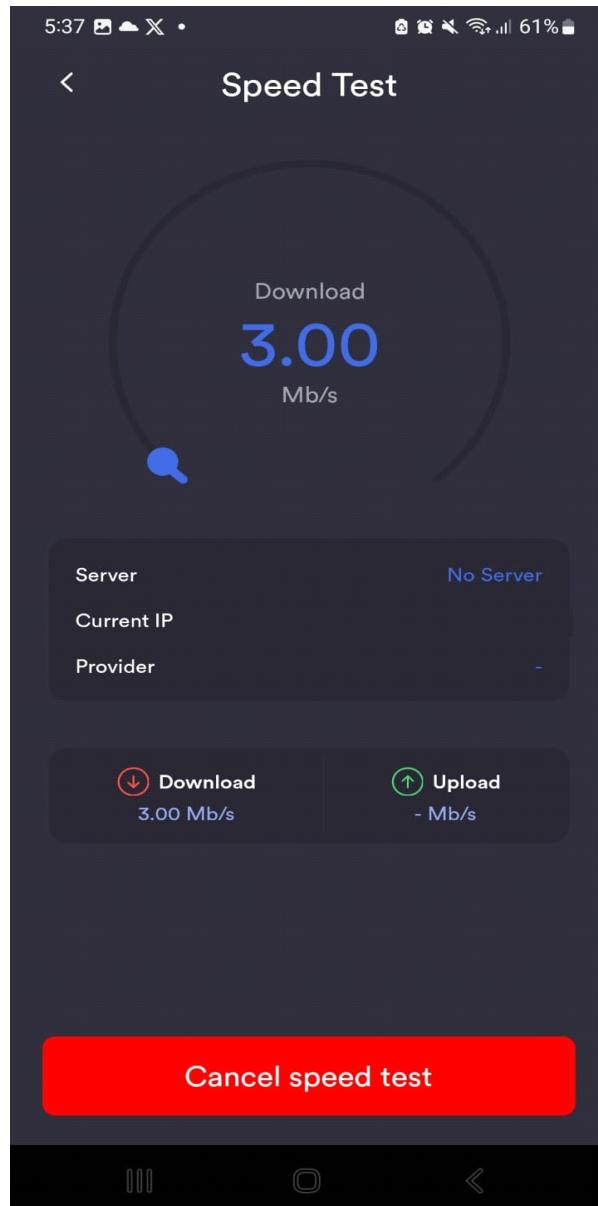

1- To perform a speed test. You will need to click on the “ **Start Speed Test** ” blue button. Once you press that button application will ping the server and it will show you the download and

upload speed on screen once speed testing is complete you will see an average download and upload speed.

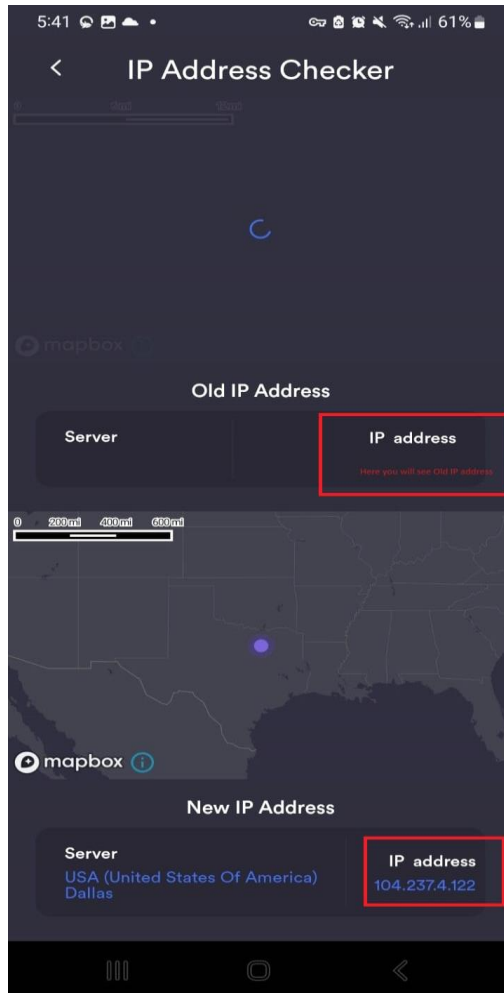

2- To Restart Speed testing simply click on the restart Blue button at the bottom of the same screen.

3- You can cancel the speed test at any time by clicking on the red " **Cancel Speed Test**" button.

IP Checker

The IP Checker page will show you an OLD IP Address without connecting to a VPN and once users enable the VPN connection you will be able to see the New IP address on the IP Address Checker page.

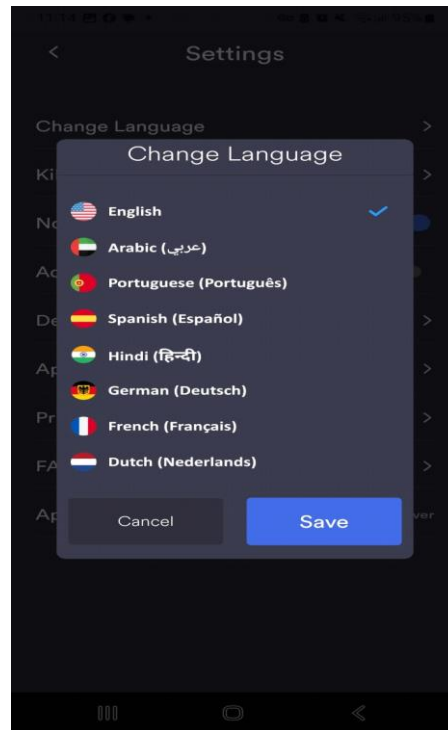

Manage OrcaVPN settings

You have the flexibility to tailor your Orca VPN app to suit your individual preferences. You'll find all the essential settings that enable you to personalize and resolve any issues with your VPN connection.

Change Language

If you want to change language, click on the change language option in the main menu. Upon clicking a Popup will appear with 8 different languages to choose from. Select your preferred language and press the "Save" button to change the language.

Notifications

You can enable or disable notifications from the main menu. You have to toggle the switch to On or off the notifications. Once the switch is blue, it will enable the notifications option.

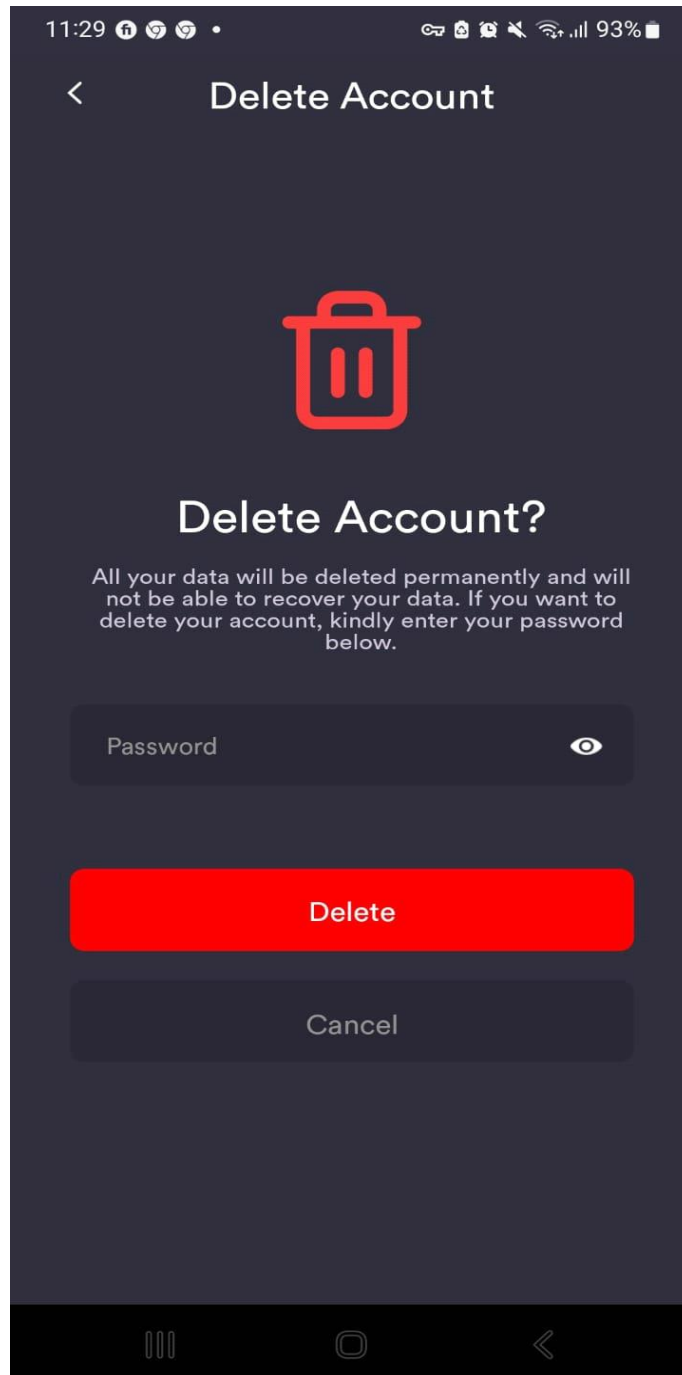

Ad Blocking

You can enable or disable the Ad blocking feature from the main menu. You have to toggle the switch to On.. Once the switch is blue, it will enable the Ad blocking functionality.

It shields you from invasive advertisements, malicious websites, deceptive phishing links, and various other security threats.

Delete Account

If you no longer wish to Orca VPN and want to delete your account. Simply go to the main menu and click on the Delete account option. This will redirect you to a new page where you have to enter your password and click on the red “ **Delete** ” button to delete your account.

App Security

Deleted regarding this section are missing there is just on line on it regarding Dark mode.

Privacy Policy

You can read OrcaVPN's privacy policy by clicking on privacy policy option. The VPN service's privacy policy providers outlines the operational details of the ORCA VPN.. This includes information about the provider's data logging policy, communicating with Orca VPN as well as specifics regarding how the application utilizes your data.

FAQs

If you need any help or if you need answers to any questions. You can visit FAQ section to find the relevant answers.

Check the connection speed after enabling the VPN

It's advisable to verify the success of your initial VPN setup by confirming your connection. You can check your connection speed on the main screen as it appears in a blue circle and you check if your IP address is updated. All you have to do is click on the IP Checker option to check your new IP address.

This is all that's presently available on our IOS app, and it has everything required for customization to meet your preferences. Enjoy the full range of positive experiences the internet offers while maintaining your privacy!
