How to Download and Install Your OrcaVPN on a Mac Device

Download

1- First of all, Visit the Orca VPN Website: Go to the official Orca VPN website and look for a download section, Download section will provide you a direct link to download the VPN or you can also download Orca VPN by launching the App Store on your Mac and entering "Orca VPN" into the search bar.

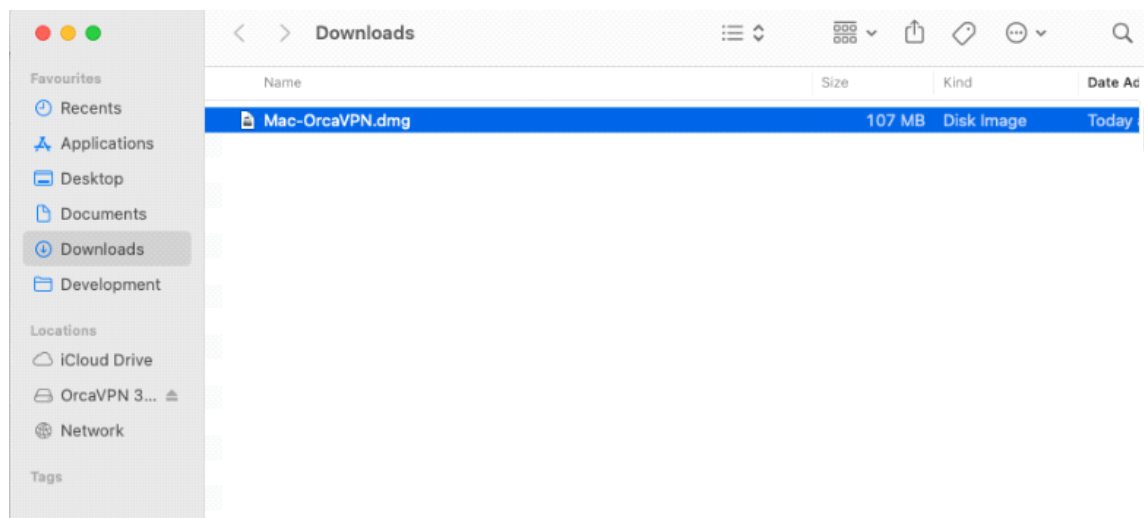

The screenshot shows the OrcaVPN website homepage. At the top left is the OrcaVPN logo. A navigation bar contains links for Home, Download, Pricing, Help Center, and a prominent red button labeled "Get OrcaVPN". The main content area features a dark blue background with the headline "Stay Secure and Private with Our Powerful VPN App". Below this, three bullet points highlight key features: "Experience Uninterrupted Streaming, Gaming, Work, and Browsing with the Fastest VPN for Windows PC.", "Seamless VPN Setup for Windows 7 Service Pack 1, Windows 8.1, Windows 10 (version 1607 or later), and Windows 11.", and "Try it risk free with our 30-day money-back guarantee". A "Download OrcaVPN" button is positioned at the bottom left. On the right side, there is an illustration of an orca sitting at a desk with a laptop, surrounded by icons representing security, documents, and a shield.

GET ORCAVPN FOR
ALL YOUR DEVICES

Connect to OrcaVPN

Upon logging in, the Orca Dashboard, where the VPN connection status is displayed, will be immediately visible. On this page, users will be able to see the server map, List of servers, and option to quickly connect to VPN.

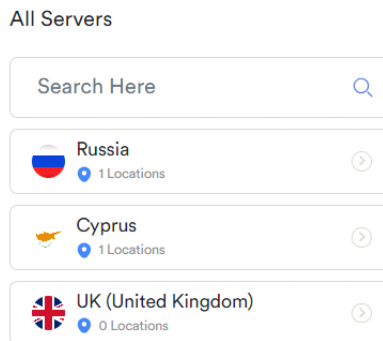

Upon the initial connection, Orca VPN will require permission to incorporate VPN configurations into your device. This step is essential to enable Surfshark to establish and manage the VPN connection on your device.

A pop-up window, similar to the one depicted in the image above, will appear. Please enter your Mac User password (the same one you use to unlock your Mac) and select "**Always Allow.**"

1- To ensure the security and privacy of your internet connection, simply connect to Orca VPN servers. Just select any server from the map or select from the list of servers on the left hand side to "**select a location**" / Country name. Once user click on that they will be able to see all the servers in that particular country.

2- You can change different server locations very easily from the list of All servers on the Dashboard and pick any different location or simply search for the location using the search bar on the top.

3- When a user clicks on a country they will be able to see different servers in different countries. Choose your desired country and its fastest server for a fast and secure internet connection.

Session Traffic

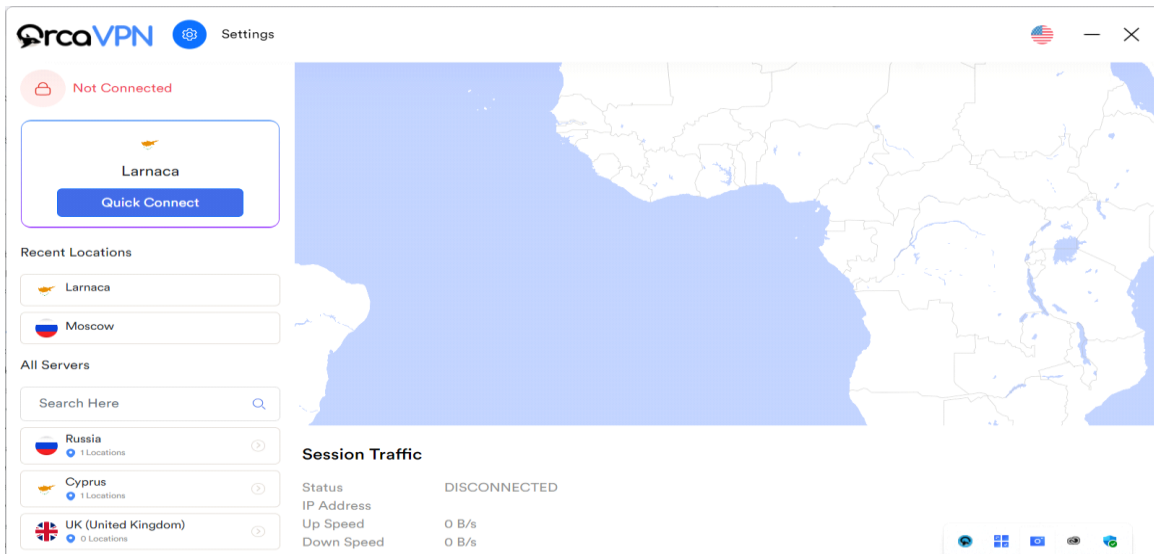

When you are successfully connected to OrcaVPN, you will be able to see your connection **Download** and **Upload** speeds on the home page. Along with the status and the IP address.

3- To disconnect from the VPN, click the Disconnect button.

Choose and Manage Orca VPN

Desiring to link up with a particular location? Orca VPN gives you the option to connect to several different servers spanning 20+ countries, allowing you to connect to any of them.

1- Navigate to the Locations section within your Orca VPN app and select your preferred location.

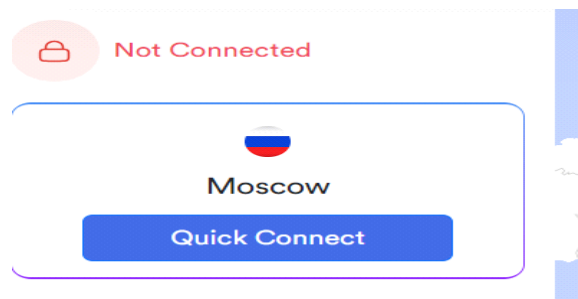

2- Tap on the preferred country from the list and you will be redirected to a new page with a list of cities.

3- Select any particular city and click the blue connect button to that particular location.

Quick Connect

The application selects a random server for you, All you have to click on is the Quick Connect button, and then the application will try to connect to that server.

1- Quick Connection Initialization starts when the user press the quick connect button and it disappears automatically and connects you to the OrcaVPN server. It will link you to the swiftest server, typically situated in proximity to your country of residence.

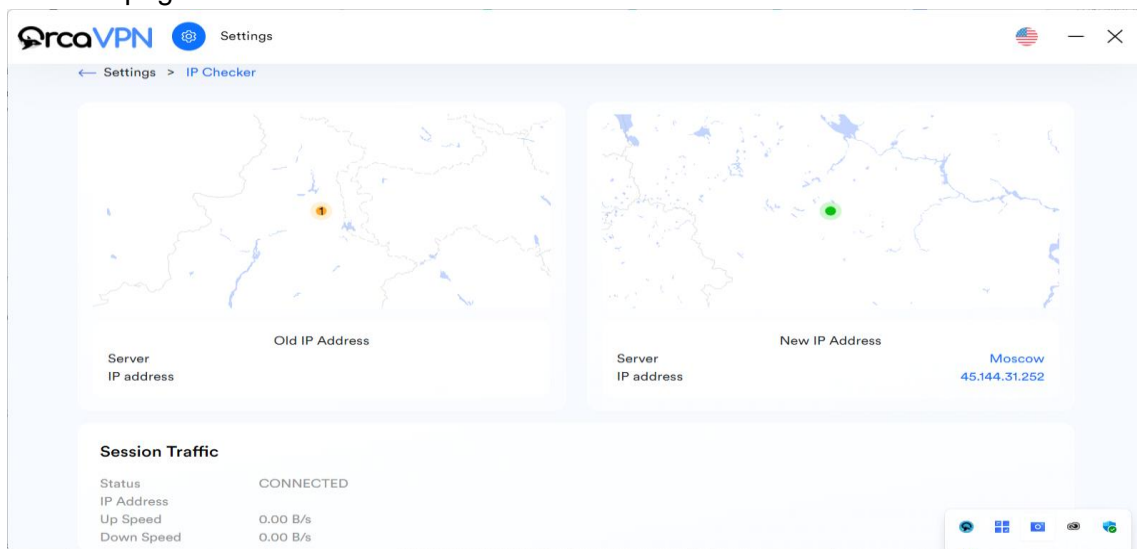

Manage OrcaVPN Key features

To manage other key features of this application users have to click on the Hamburger menu button. They will be able to edit the following options

- 1- IP Checker
- 2- Dark Theme
- 3- My Account Details
- 4- Kill Switch
- 5- Multi Languages
- 6-Ad Blocker

IP Checker

The IP Checker page will show you an OLD IP Address without connecting to a VPN and once users enable the VPN connection you will be able to see the New IP address on the IP Address Checker page.

Change to a Dark Theme

To change the application color mode you can pick either lite color or dark color modes simply using the slide button option.

My Account

Click on Welcome Followed by your name option to view the account and subscription details. When a user clicks on this option they will be able to see two options. General Settings and Subscription.

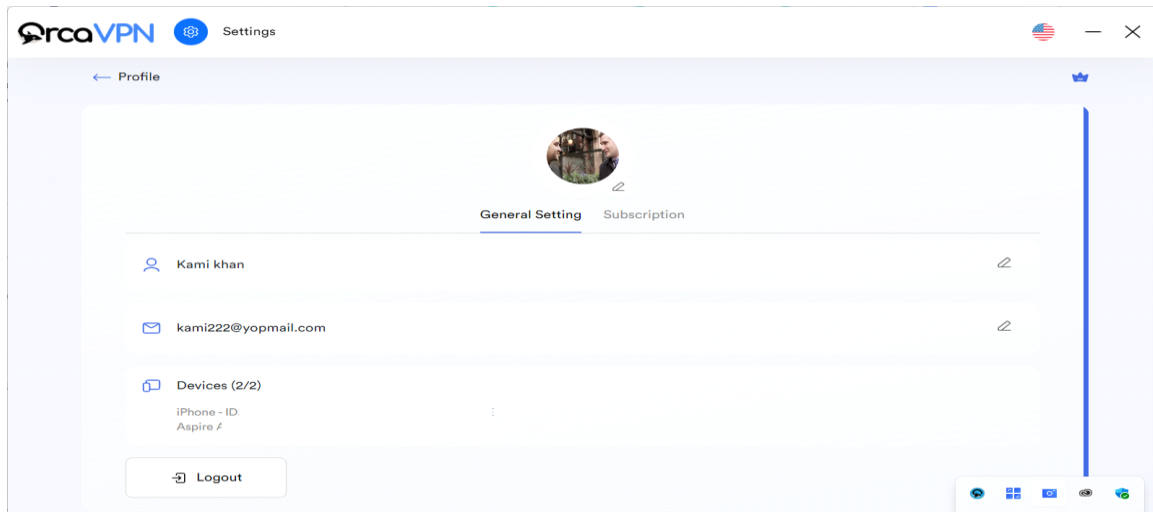

General Settings

When you click on Welcome (Your Name), you will be redirected to a page that shows your general settings and on this page, you can add the following information:

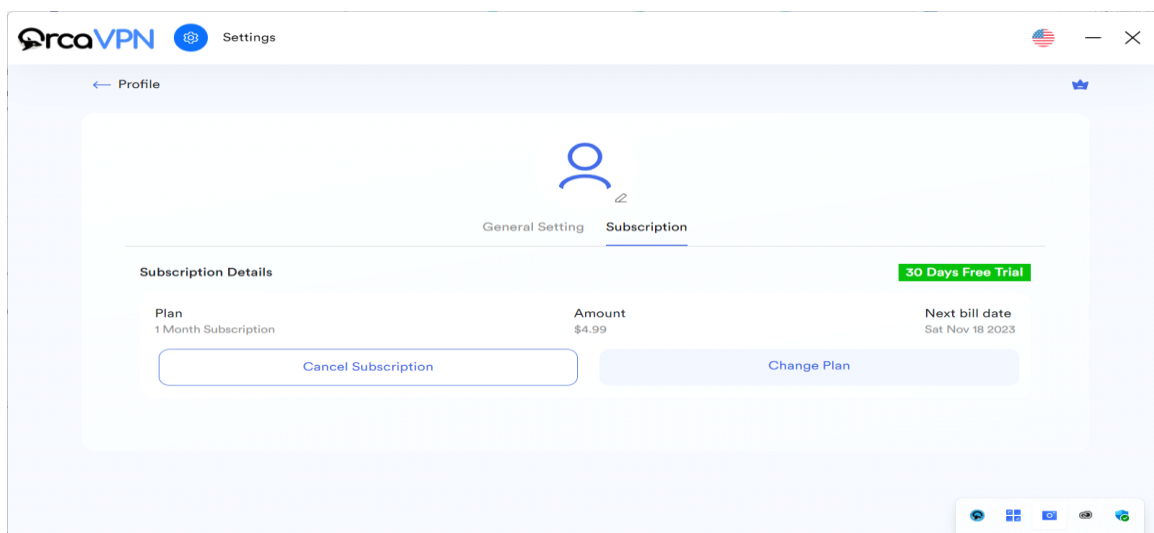

- **Edit/ Upload profile picture.**
- **Full Name**
- **Email Address**
- **Devices**

On this page, you will see your mobile device details and a logout button to logout from the application.

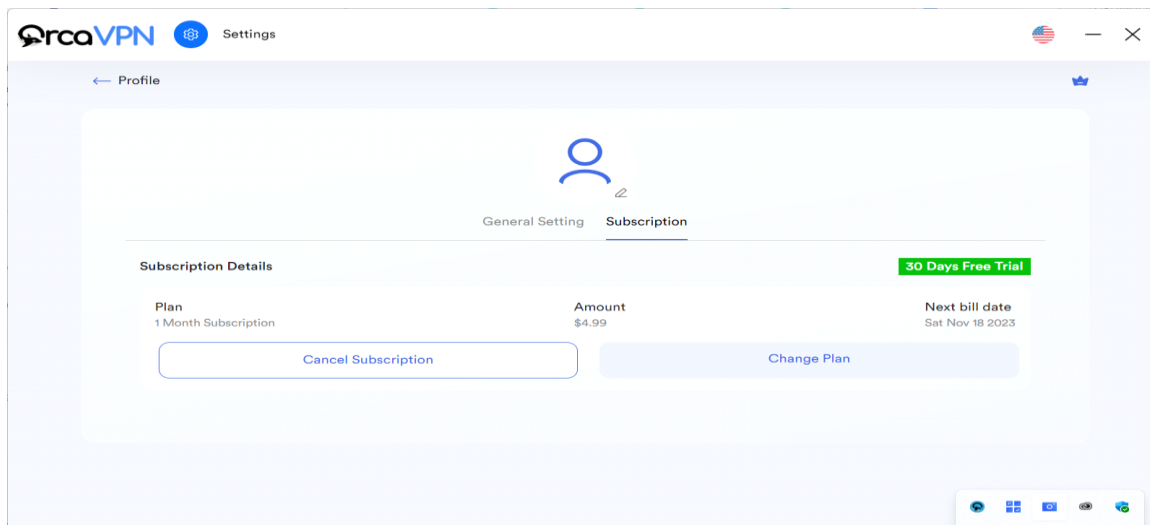

Subscription

When you click on the subscribe tab you will see the details of your subscription.

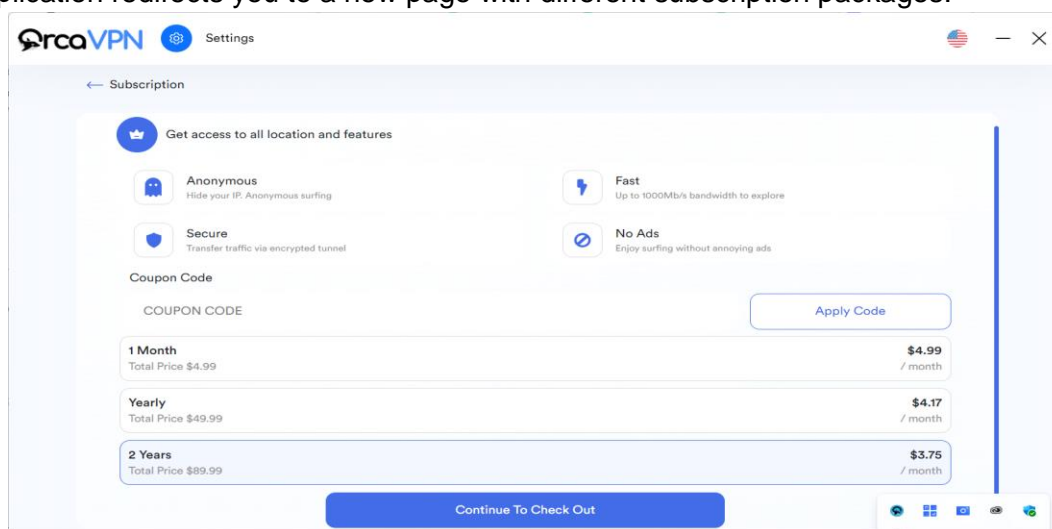

Cancel Subscription

If you want to cancel your subscription, click the **cancel subscription** button. Your subscription will be canceled without any confirmation. So be careful with this step.

Change plan

If you want to change your subscription plan then you have to click the **Change Plan** button and the application redirects you to a new page with different subscription packages.

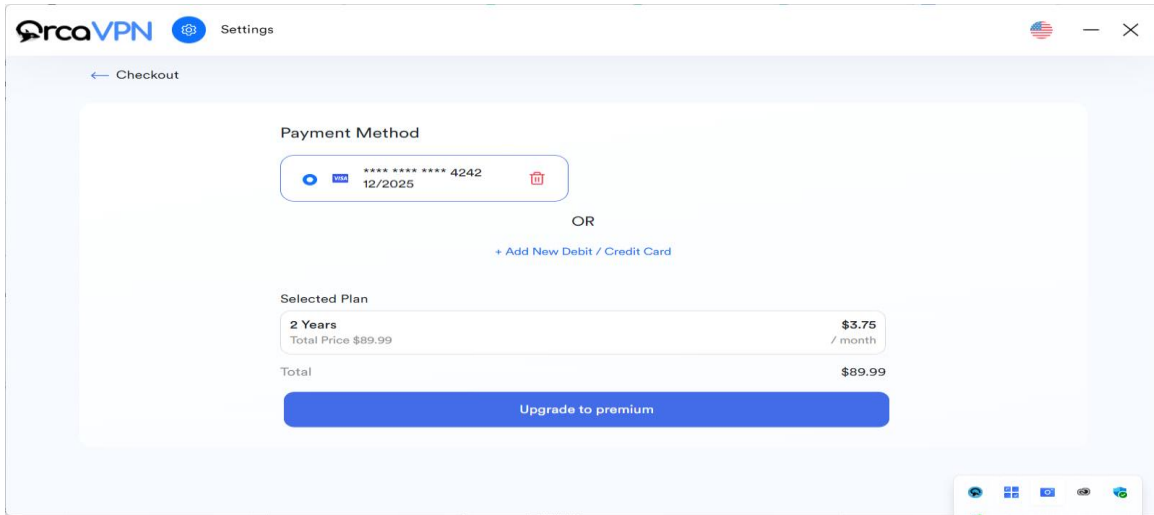

You can select Either:

- **1 Month subscription**
- **1 Year Subscription**
- **2 Years Subscription**
- Once you select an option, click on the **Continue to check out** button. It will take you to the payment method page. On this page, you have to select a payment method and click the upgrade to the premium button.
- On this page, there is another option that is to add a new Debit or credit card.

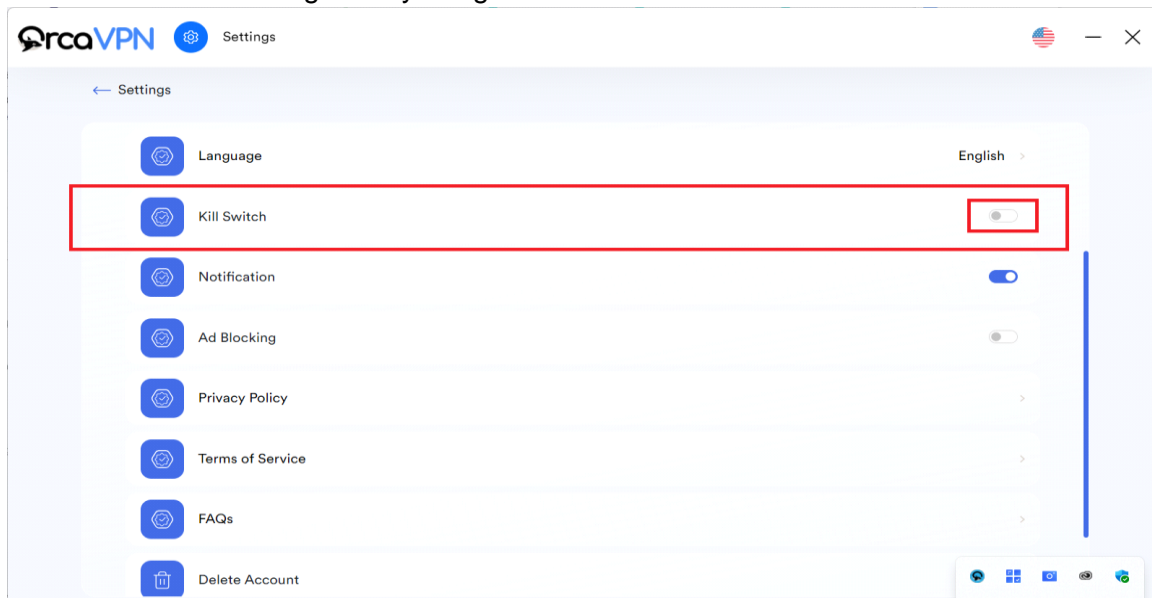

Check out

On the Checkout page, you will see your current plan details and options to add a new payment method. Click on the **Add new Debit or credit card** option to add new card details once you pick the desired package. Click on the **Upgrade to Premium** blue button to complete the checkout process.

Kill Switch

Kill Switch feature safeguards you against unforeseen VPN disconnections. So enable it.

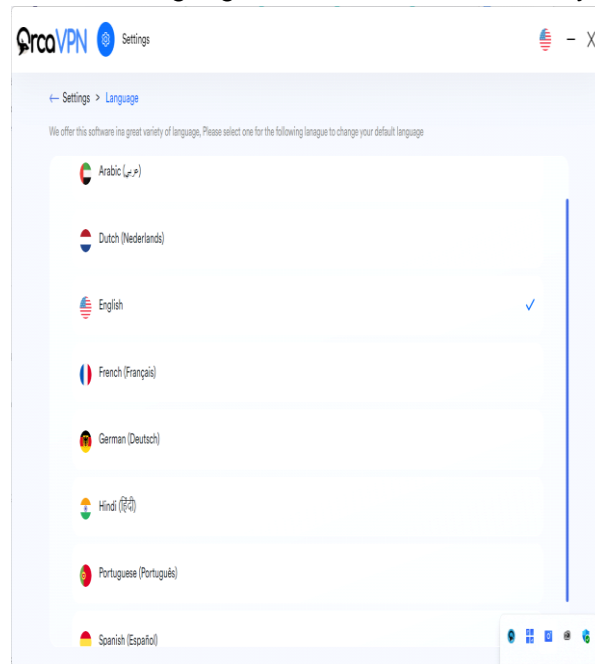

Manage OrcaVPN settings

You have the flexibility to tailor your Orca VPN app to suit your individual preferences. You'll find all the essential settings that enable you to personalize and resolve any issues with your VPN connection.

Change Language

If you want to change language, click on the change language option in the main menu. Upon clicking you will see 8 different languages to choose from. Select your preferred language

Notifications

You can enable or disable notifications from the main menu. You have to toggle the switch to On or off the notifications. Once the switch is blue, it will enable the notifications option.

Ad Blocking

You can enable or disable the Ad blocking feature from the main menu. You have to toggle the switch to On.. Once the switch is blue, it will enable the Ad blocking functionality.

It shields you from invasive advertisements, malicious websites, deceptive phishing links, and various other security threats.

Delete Account

If you no longer wish to Orca VPN and want to delete your account. Simply go to the main menu and click on the Delete account option. You will see a popup window and you have to confirm the delete account option by clicking on the “ **Delete** “ button to delete your account.

Privacy Policy

You can read OrcaVPN's privacy policy by clicking on the privacy policy option. The VPN service's privacy policy providers outline the operational details of the ORCA VPN.. This includes information about the provider's data logging policy, communicating with Orca VPN, and specifics regarding how the application utilizes your data.

FAQs

If you need any help or if you need answers to any questions. You can visit the FAQ section to find the relevant answers.

Check the connection speed after enabling the VPN

It's advisable to verify the success of your initial VPN setup by confirming your connection. You can check your on the main screen and you check if your IP address is updated. Top disconnect VPN users can either do it from the Dashboard or they can disconnect from the system tray.

This is all that's presently available on our MacOS Orca VPN app, and it has everything required for customization to meet your preferences. Enjoy the full range of positive experiences the internet offers while maintaining your privacy!
